

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1.-16. (Cancelled)

17. (Once Amended) A server apparatus comprising:

an information provider which receives an information signal from a subscriber apparatus, the information signal a) capable of indicating that an output signal outputted from said server apparatus is provided to a display terminal in said subscriber apparatus without being recorded; and b) capable of indicating that said output signal outputted from said server apparatus is recorded in said subscriber apparatus;

a subscriber mode recognizer which discriminates between said output signal being provided to the display terminal without being recorded and being provided to the recorder based on the information signal;

a charger which charges a different amount among a) in the case that the output signal is provided to said display terminal without being recorded and b) in the case that said output signal is provided to said recorder, based on the recognition of said subscriber mode recognizer.

18. (Once Amended) A subscriber apparatus according to claim 17,

wherein said charger charges a larger amount when the output signal is provided to said recorder than to said display terminal without being recorded.
